

FUNGI AT ONKAPARINGA CP, 29th AUGUST 2009.

c. Collection for herbarium
FM. Fungimap target

GILLED FUNGI

Amanita farinacea White cap, rather floury, membranous veil, white stipe, gills, volva crumbling.

Amanita umbrinella sticky, grey cap, membranous veil remnants

Amanita ochrophyloides. Smelly. Flat warts on cap, slight orange tinge on stipe, stipe white.

Coprinus micaceus. Inkcap. Striate, parabolic cap with white particles in young specimens. Clumped, on wood.

Laccaria sp. ?B. Brown cap, pink-mauve-grey gills.

FM. *Lichenomphalia chromacea*. Small yellow funnel-shaped cap, on bare ground.

Tubaria sp. an lbm

Unidentified yellowish cap

Unidentified sticky yellow-brown cap.

A cortinar, small brown mushroom.

TRUFFLES

Descomyces sp. white 'skin' with small yellow-rusty patches, gleba brown.

Hydnangium carneum 'false truffle' - basidiomycete, peridium pale pink/white, gleba pinkish, chambered

ASCOMYCETES

Hypocrea sulphurea – small yellowish lumps on wood.

c. *Hypoxylon* sp. Small black 'cushions'

Peziza sp.

Trichoderma sp. Asexual stage of *Hypocrea*.

BRACKETS AND SHELVES

Meruliopsis corium. Flat to reflexed-resupinate on wood, grey white, labyrinthine fertile surface.

Poria sp. White

c. *Porodisculus pendulus*. Little brown, pored hoof.

Pycnoporus coccineus Scarlet Bracket

Stereum illudens – shelf fungus forming lines of scalloped, thin 'shelves; upper surface hairy, zoned brown, grey; lower surface smooth, mauve-grey

Flat white, poroid

Phlebioid flat resupinate

CLUB FUNGI

Clavulina vinaceocervina. Greyish-white upright to somewhat wavy clubs covered with small tubercles.

JELLY FUNGI

Calocera guepinioides. Short yellow 'horns' on wood.

Dacrymyces sp. Tiny orange disc on wood.

Exidia nucleata. Grey-white jelly

Heterotextus peziziformis. Orange jelly bells

FM. *Tremella mesenterica*. Orange jelly

EARTHBALLS

Scleroderma sp.
